

Bedour Ahmad Alayyad

XR & AI Developer

bedourahmadal@gmail.com | +966 549466436 | Riyadh, Saudi Arabia | linktr.ee/Bedourahmad

PROFESSIONAL SUMMARY

XR Developer specializing in Augmented, Virtual, and Mixed Reality using Unity and C#, with a strong foundation in computer science and applied AI. Experienced in building immersive applications using AR Foundation, OpenXR, Vuforia, Meta Quest, and Unity Sentis. Skilled in computer vision, AI integration, spatial computing, and cross-functional collaboration to deliver real-world XR solutions.

EXPERIENCE

AI & XR Developer — Autoxtion

Mar 2026 – Present

- Developing immersive Mixed Reality and Augmented Reality applications for Meta Quest 3 using Unity, C#, and modern XR development frameworks.
- Leading the development of **BeautyMR**, an AI-powered Mixed Reality beauty assistant that integrates Meta XR SDK, Unity Sentis, BlazeFace, and computer vision techniques for real-time, on-device face detection and virtual beauty experiences.
- Designing and integrating AI-powered workflows combining computer vision models, real-time inference, and spatial computing to deliver interactive XR solutions.
- Implementing optimized AI pipelines for edge devices, ensuring efficient performance and real-time user interaction within immersive environments.

XR & AI Developer — MiningVerse (MVR)

Nov 2025 – Feb 2026

- Led the end-to-end development of the **AI Mineral Intelligence System**, an XR-based solution combining Mixed Reality, Artificial Intelligence, and computer vision technologies.
- Designed and developed an interactive workflow that enables field workers to identify mineral types and analyze properties through AI-assisted visual recognition.
- Integrated XR interactions, AI models, and data-driven analysis to create an immersive decision-support system for mining environments.
- Collaborated on developing a scalable XR experience focused on improving field efficiency and enhancing real-world operational workflows.

Training & Development Committee Member — Shaqra University

Dec 2018 – Jan 2021

- Supported the planning and coordination of training programs, workshops, and student development initiatives.
- Assisted in organizing educational activities and improving engagement through structured training experiences.

EDUCATION

M.Sc. in Artificial Intelligence — Bahrain Polytechnic, Bahrain

Sep 2023 – Sep 2024

- Focused on artificial intelligence, machine learning, deep learning, and the design of intelligent data-driven systems.

B.Sc. in Computer Science — Shaqra University, Saudi Arabia

Jul 2017 – May 2021

- Studied programming, algorithms, data structures, software engineering, databases, and computer science fundamentals.

TRAINING AND CERTIFICATIONS

XR Bootcamp (AR/VR/MR Development) — Tuwaiq Academy

Jul 2025 – Aug 2025

- Developed immersive AR, VR, and MR applications using Unity, C#, OpenXR, and the XR Interaction Toolkit.

Augmented & Virtual Reality Bootcamp — Saudi Digital Academy

Aug 2021 – Oct 2021

- Learned the fundamentals of designing and developing augmented and virtual reality applications using Unity.

SKILLS

- **XR Development:** Unity, C#, AR Foundation, XR Interaction Toolkit, OpenXR, Meta Quest 3, Mixed Reality
- **AI & Computer Vision:** Unity Sentis, BlazeFace, YOLOv7, Computer Vision, LLM Integration, ONNX
- **SDKs & Platforms:** Meta XR SDK, Vuforia, Google ARCore, Convai SDK.
- **Programming:** Python, C#.
- **Soft Skills:** Mentorship, Collaboration, Communication, Problem Solving, Adaptability

PROJECTS

BeautyMR — AI-Powered Mixed Reality Beauty Assistant

- Developed a Mixed Reality beauty assistant for Meta Quest 3 using Unity, Meta XR SDK, and Unity Sentis.
- Implemented real-time on-device face detection using BlazeFace for privacy-preserving computer vision processing.
- Designed the foundation for AI-powered skin analysis, foundation shade matching, and virtual makeup preview.

AI Mineral Intelligence (XR + AI)

- Developed an XR application that identifies mineral types and properties using computer vision, LLMs, and Mixed Reality.
- Created an AI-assisted workflow to support field workers in mineral inspection and decision-making.
- Showcased at the Future Minerals Forum 2026.

VR & AR Book Library

- Built an educational XR application combining Augmented Reality and Virtual Reality experiences.
- Enabled users to scan book covers and access interactive AR content, 3D elements, and immersive VR activities.

VRlingo — Language Learning in VR

- Developed a VR language-learning application using cultural immersion, NPC interaction, and conversational practice.
- Designed interactive environments to enhance real-world communication skills through immersive learning.

Vehicle Detection Using YOLOv7

- Developed a real-time vehicle detection model using YOLOv7 and Python.
- Performed dataset preparation, model training, evaluation, and inference for computer vision applications.

VOLUNTEERING EXPERIENCE

AI Mentor — AgentX Hackathon — QabasTech (Riyadh & Qassim)

Nov 2025 – Jun 2026

- Provided technical mentorship to participating teams, supporting AI-driven project development and helping solve implementation challenges.

Technical Mentor — Noura Hackathon — Princess Nourah University

Apr 2026

- Provided technical guidance, reviewed prototypes, and supported teams in solving development challenges.
